#### Main Menu

The main view of the iPhone app, features a swipeable menu showing various functions on the two pages.

Swipe to access second page

### Search Function (Search on Address, City, State, Zip or MLS #)

To start searching, tap on "Search" from the main menu. Within the search input field, an address, city, state, zip code, or MLS # may be typed. Refine the search, by selecting the "Filter Options" Once search filters are set and saved, tap the blue "Search" button. A query will run and retrieve listings that match the criteria.

Filter Options Set

#### Search Function (Results)

Search results default to the map view. Price Markers are visible on the map to select and view listing details.

Blue markers – Active Listings Blue markers with arrow – Price Reduced Red markers – Inactive Listings (Sold, Pending, Etc.)

To switch to a list view, select the "List" button from the bottom bar. Sort buttons are also provided at the bottom of this view.

#### Search function (Draw Search)

A search may also be performed by drawing an area on the map. Select the Lasso tool on the bottom toolbar and draw a shape on the map.

A query will run to retrieve listings that match the area drawn on the map. Once retrieved, all listings will appear within the area drawn. List view is also available at the bottom. All Search filters (i.e. price, bedrooms, baths, etc.) are held and can be readjusted.

#### Search Function (Homes Near Me)

Ensure Location Services is turned on for the app in Settings.

Go to the main menu and select "Near Me."

Within filters you can also set a radius around your location (i.e. 5 miles).

Search for homes near you

Current location & radius set

Save search results by selecting "Save Search" button beneath the search input field.
