Hancock & Wyandot Counties

The housing data for **Hancock and Wyandot Counties** in May 2025 reflects notable shifts in both single-family and condo/villa markets. In the **single-family sector**, new listings surged by **26.4%**, indicating increased seller participation, yet **closed sales declined 15.9%**, suggesting a mismatch between inventory and buyer readiness. Despite the dip in sales, home values remained strong—**median sales price jumped 14.3% to \$259,950**, and year-to-date prices also rose, with an **11.5% increase in the average sales price**. Days on market improved slightly for May but rose over the year, and inventory increased from 11 to 14 months, signaling a market slowly normalizing.

Conversely, **condo/villa activity increased** across most metrics: listings and closed sales both rose **20%**, and **total volume spiked 45.5%** year-over-year for May. However, condos stayed on the market much longer—**96 days on average**, more than double the previous year. Prices also saw strong appreciation, with **median condo prices up 34.3% in May**. Overall, the region shows robust price growth and more inventory, though longer selling times and slower absorption suggest buyers are proceeding with more caution.
