### Hancock & Wyandot Counties

In Hancock and Wyandot Counties, the single-family market showed mixed conditions in November, with new listings and closed sales both declining slightly from last year, yet prices surged—median sales price jumped nearly 46% and average price rose 20%—indicating strong demand for higher-value homes even as activity cooled. Homes spent a bit longer on the market and inventory increased, signaling a slow shift toward a more balanced environment, but sellers still received 98% of asking price, reflecting continued competitiveness. Year-to-date trends reinforce market strength, with closed sales up 4.6% and total volume rising 14.7%, supported by steady price appreciation.

The condo/villa segment saw very different dynamics: new listings doubled in November while closed sales fell, pushing inventory higher. Prices, however, climbed sharply—especially average price, up 38.5%—suggesting that fewer but more expensive units sold. Year-to-date condo activity remains strong, with closed sales up 36% and modest price growth, though a rise in days on market shows that buyers are taking longer to commit. Overall, both markets indicate expanding inventory and softening pace of sales, but strong pricing points to underlying demand and solid market fundamentals heading into 2026.
